

EMS Policy

Kukdong Corporation will ensure that Kukdong and all its own and subcontract factories strictly apply the following policy to foster environmentally sound business practices, so Kukdong can contribute to the environmental protection and sustainable business operation, which will be periodically reviewed and re-evaluated for its effectiveness.

1. They should establish an Environmental Management Plan which presents a vision statement to specify key goals, operational objectives, and strategies to achieve the above, and also establishes an environmental audit protocol as a basis for evaluation and continuous improvement.
2. They should develop programs and procedures to comply with all applicable laws.
3. They should raise awareness on environmental responsibility among all workers and members of its HQ and affiliates, branches, subsidiary through regular trainings and educations.
4. They should eliminate the unnecessary use of hazardous substances and processes and take all reasonable measures to protect the environment when their use is unavoidable.
5. They should ensure all waste materials from the Kukdong operation are recycled as part of its routine operations.
6. They should continue to promote the principles and practices of environmental responsibility by sharing knowledge and experience with our buyers and interested parties.
7. They should promote a purchasing policy that will give preference, wherever practicable, to those products and services that cause the least harm to the environment.
8. They should ensure all kinds of wastewater released from living and production activities are well treated by wastewater treatment with the ambition of decreasing impacts and preventing pollution on the environment.
9. They should regularly monitor and report their environmental performance to Kukdong HQ.
10. They should establish an environmental audit process as a basis for evaluation and continuous improvement.
